VOLUME 15, No. 44

COUNCIL MEETING
LAST MONDAY

Report of Revision to Pitt June 2—
Council Endorse Expansion of
Calgary Power Co.

The regular monthly session of the Basano Town Council was held in the Town Hall last Monday evening, May 5.

The council endorsed the resolution of the Calgary Board of Trade respecting the storage of water at Lake Minnewanka, near Banff, by the Calgary Power Co. for the production of additional electric power. Basano and other towns in southern Alberta would directly benefit by this water power development which would provide additional electric power for current users.

The town engineer reported repairs and improvements in the pump station and water intake which would avoid further trouble. This report included repairs to town property, water and sewer service installed at Pierson's new service station; considerable work on the streets; a number of culverts; crossing streets made longer, and gates made for the ditches in the town irrigation system.

A committee from the Board of Trade interviewed the council regarding the extension of the irrigation system to the cemetery. The council agreed to extend the irrigation system to the cemetery, and the town engineer was instructed to proceed with the work.

It was decided the court of revision would sit on June 2 to hear any matter for the next three months.

Accounts.
The following accounts were read and passed for payment:
National Meter Co. Ltd. 24.95
King's Printer 5.00
Light and power acct. 347.20
Basano School Dist. 1000.00
Pay roll for April 559.05
Wm. Honey 271.00
Barroughs Adding Mach. Co. 14.00
Metals Ltd. 31.28
McKenzie's Store 2.50
Currie & Milroy Ltd. 21.40
Workmen's Comp. Board 71.25
W. S. Playfair 11.68
A. H. Maurer 1.60
Imperial Hotel 1.50
R. A. Travis 26.90

Will Extend The
Irrigation System
To The Cemetery

Town Council Will Install Pump and
Pipe Line for Cemetery
Irrigation

The trees in the Basano cemetery grounds will this year be watered by means of irrigation from the town irrigation system.

The town council in regular session last Monday evening was interviewed by the cemetery committee of the Board of Trade with a view to having the irrigation system extended to the cemetery. The council agreed to the proposal, and the work will be done as soon as possible.

The cost will be in the neighborhood of \$250 or \$300. It is understood the Women's Institute has agreed to contribute \$50 toward the cost, and additional funds may be available from other sources.

At the cemetery lies at a higher elevation than the irrigation ditch, it will be necessary to use a pump and pipe line to raise the water to a point where it will flow over the cemetery grounds. An electric pump and several hundred feet of pipe will be procured for this purpose.

W. I. Will Hold
Card Party And
Old Time Dance

A card party and old time dance will be given in the Oddfellows' Hall Wednesday evening, May 28, under the auspices of the Women's Institute.

The purpose of this social affair is to raise money for the improvement of the cemetery grounds. The W. I. has undertaken to contribute \$50 toward this improvement, and the card party and dance is being held with the hope of raising this much or a larger sum if possible.

Hussar News

HUSSAR, May 7—Rev. H. E. Gordon, conducted an examination in grammar of music on Saturday for the pupils of Mrs. H. Sainsbury, Ivan Anderson, and Lottie Wendland. Miss Lorraine Heitch, teacher of Miss Laine school, also took the examination.

Mr. and Mrs. A. A. Clifford motored to Calgary on Thursday to meet Miss Evelyn Clifford, who returned from Edmonton at the close of her senior year there. They returned on Friday.

Mrs. F. P. C. Farley and Mrs. H. D. Brown, and Mrs. A. A. Clifford, Mrs. J. Dundas and Miss Evelyn Clifford were among the guests at the W. I. Mothers' Day entertainment at Chancellors on Friday afternoon. They report will most interesting program, and a large and appreciative audience.

Rev. H. E. Gordon has been helping the Chancellors Sunday school on Sunday morning.

Mrs. W. C. Beeson and A. M. Mahoney motored to Calgary on Tuesday.

There will be a business meeting of the members of the Hussar Ladies Aid at the kitchen on Saturday at 1:00 p.m. to begin making arrangements for their work on May 24th. They will serve supper in the kitchen and will also conduct the bazaar at the grounds. Mrs. J. R. Hurd is in charge of the kitchen committee, and Mrs. A. Clifford, of the bazaar.

The Hussar Lodge No. 31, Knights of Pythias, will hold a memorial service at the R. and S. Hall in Standard on Sunday afternoon at 2 o'clock. Mrs. J. Hought, who has been quite ill in the Basano Hospital for several weeks, returned to Hussar on Saturday.

Miss A. Robinson and Miss E. Clifford motored to Dranchell on Saturday.

The time of the year is approaching when the schools of Hussar and vicinity should select the most popular athletes to represent them in the contest for the shield and medal given by the Hussar-Lodge A.F. & A. M.

Pupils of the Hussar school should remember that the Hussar W. I. is again offering a prize for the pupil in each of grades 8, 9, 10, and 11 who obtains the highest mark in the history examinations of June.

The W. I. library is being well patronized. It is at the home of Mrs. T. L. Montgomery and is open to all members and their families as well as, under certain conditions, to the general public. It is not a money-making scheme, but is intended to meet the demand for good reading material. A very high class of fiction can be found in this library, which has been loaned by the department of extension, University of Alberta.

The Sunday school is having a Mothers' Day program at the hall on Sunday at 2:00 p.m.

The fine weather of the past week has enabled many farmers to finish seeding. They feel that the fields have never been in better shape at this time of year.

Young People's Meeting.
On Monday evening the Young People's Society put on a most entertaining Mothers' Day program. The mothers of the village were invited to be present, and there was a good turnout. The devotional exercises consisted of the singing of hymns, Bible reading by Margaret Bell, and an article, "Young Men, What Are You Worth?" by Rev. H. E. Gordon. The rest of the program was as follows: solo, "Mother's Love," by Lila Clifford; accompanied by Miss Robinson; reading, "Somebody's Mother," by Gordon Reeves; duet, "Don't Forget the Pat You Left at Home," by Lila Nelson and Katie Graham; piano and saxophone duet, "Dreaming," by Margaret and Jason Bell; Mothers' Day story by Rev. Gordon. The remainder of the evening was spent in a business session, followed by singing games. Woodrow Elliott, the vice president, presided. On Wednesday evening, May 15, the young people will close the year's work with a banquet for the members.

GOLF NOTES

Golf has suffered a slump. The cold and windy weather has kept the golfers off the course, and prevented many from trying the new holes which were made during the past few days. Those who have played since the changes were made say the course is much improved over last year.

PROVINCIAL WEED
CONTROL PROGRAM

The Alberta Department of Agriculture has now completed its plan for the weed control program of 1930. Under the Field Crops Branch the province has been divided into fifteen districts. In each of these districts a field crop inspector has been stationed. His duties will be to co-operate with weed inspectors appointed by municipal councils, and in local improvement districts. In general weed control work and the enforcement of the Noxious Weed Act.

Farmers of the province are urged to avail themselves of the services of these men. Their office centres are being advertised in this issue.

Countess

COUNTRESS, May 8.—Levesque, of Wayne, is here visiting his brother.

Mr. and Mrs. Benjamin and Mr. and Mrs. Danmar will occupy the elevator house during the summer. They are in the employ of the C.P.R. D.N.R. on the tugboat, and expect to be in this district until June 15.

David Osborne, missionary student of the United Church, will hold services here and at Rosemary during the summer months, beginning next Sunday, May 11. Service here at 2:30 p.m.; Sunday school at 2:30 p.m. are all invited.

A. W. Dingle, post office inspector, was here and at Gem on Tuesday. A number of farmers of the district are planning out fruit trees this spring.

A great many C. P. R. section men are being let out, which is most unusual at this time of the year. The C. P. R. must be feeling the pinch with the end of us.

Miss M. Ballie took tea with Mrs. Sains on Wednesday.

Orville Hartley, of Basano, spent Wednesday evening with Mrs. A. M. Anderson.

Farmers are all busy on the land, and are quite elated over the prospects of a good crop.

An accident which might have resulted much more seriously occurred between here and Basano on Wednesday evening. E. Gordon, roadmaster on the Rosemary-Rosebrook line, and other gentlemen were proceeding to Basano on a speeler. When rounding a curve they met the Basano train. The speeler jumped and escaped injury, but their machine was completely destroyed.

Mothers are particularly invited to the Sunday school service next Sunday, Special Mothers' Day program.

More Rain
Helps Growing
Wheat Crop

Moisture Content in Soil Maintained
by Additional Precipitation

What is in Splendid Condition, and
Crop Outlook is Good

The weather man continues to smile on the farmers in the Basano and neighboring districts. More rain fell during the past week, and although the precipitation was not heavy it was sufficient to maintain the generous supply of moisture which was already in the soil.

Showers occurred on April 20, May 3 and 7, and today, Thursday, the sky was again overcast with heavy clouds, and a north wind carried indications of more rain to us.

The precipitation as measured by the C.P.R. D.N.R. rain gauges at Basano, the dam, Countess, and Rosemary, was as follows:

Station	May 3	May 7
Basano	15.18 in.	15.18 in.
Basano Dam	10.18 in.	17.18 in.
Countess	17.18 in.	18.18 in.
Gem	18.18 in.	18.18 in.

Basano 15.18 in.
Gem 18.18 in.
Wheat fields are looking quite green, and some of the early sown crops measure six inches in height.

The water has been turned into the irrigation canals, but so far no rainfall has been sufficient to detain the necessity of irrigating.

Pastures are looking splendid, and the grass is growing very rapidly.

Bearsats Getting
In Shape For
Baseball Season

How Valley Schedule Drawn Up
First Game May 11th When
Basano Plays at Queenstown

With the How Valley Baseball League schedule for 1930 drawn up, the local boys getting in shape for play, the Bearsats will soon be ready for the opening of the baseball season at Queenstown on May 11.

The Bearsats will play in the first league game of the season when they will journey to Queenstown next Sunday, May 11. The first game on the Basano diamond will be played Wednesday, May 21, between Arrowwood and the Bearsats.

The complete schedule is published hereunder.

May	May
11 Basano at Queenstown	14 Arrowwood at Arrowwood
14 Queenstown at Meadowbrook	21 Arrowwood at Basano
21 Arrowwood at Basano	28 Meadowbrook at Queenstown
28 Queenstown at Arrowwood	June 4 Basano at Arrowwood
June 11 Sports day at Arrowwood	June 18 Arrowwood at Queenstown
June 25 Arrowwood at Queenstown	July 2 Queenstown at Basano
July 9 Basano at Arrowwood	July 16 Arrowwood at Basano
July 23 Basano at Queenstown	July 30 Arrowwood at Basano
August 6 Basano at Meadowbrook	August 13 Meadowbrook at Basano
August 20 Basano at Arrowwood	August 27 Arrowwood at Basano
September 3 Basano at Queenstown	September 10 Queenstown at Basano
September 17 Basano at Arrowwood	September 24 Arrowwood at Basano
October 1 Basano at Queenstown	October 8 Queenstown at Basano
October 15 Basano at Arrowwood	October 22 Arrowwood at Basano
October 29 Basano at Queenstown	November 5 Queenstown at Basano
November 12 Basano at Arrowwood	November 19 Arrowwood at Basano
November 26 Basano at Queenstown	December 3 Queenstown at Basano

Federal Election
This Summer

Actual Date of Election Still Matter
of Conjecture, but Early
Date Probable

OTTAWA, May 7.—Voters will go to the polls in Canada this summer for a general election, probably the last week in July.

After holding the reins of office for four years in this term, the government of Premier Mackenzie King yesterday announced a new endorsement would be sought in a general election to the people.

While rumors of a general election had been heard for some weeks, the announcement came to the house of commons with dramatic suddenness. Hon. R. B. Bennett, Conservative leader, had just finished a measured indictment of the budget, brought down last Thursday and had moved a vote of want of confidence in the government.

Mr. King rose to his feet a few minutes before six o'clock and announced that a general election would be held at the earliest possible date.

When that date will be a matter of conjecture. Notice of 60 days is required before the election can be held. It is, as many believe, the business of the session can be completed in two weeks' time, voting will take place about the last week in July.

Tennis Club Will
Elect New President

We Weather Interference With the
Game—Improvements Being
Made on Courts

Not weather and high winds this week have interfered with tennis, and local players have been obliged to keep out of the game on this account.

In the meantime the tennis grounds have been undergoing improvements. Repairs have been made in the fence, and now it won't be necessary to close up many balls which formerly escaped through holes in the wire netting.

The president, W. J. Blankenship, having moved to Ontario, it is necessary to choose a new president. A meeting for this purpose is called for Wednesday, May 14, at 8:30 p.m., in the office of Wm. McLaws.

Gem News

GEM, May 7.—Mr. and Mrs. C. Villet spent the week-end in the Colony, returning to Villet on Monday.

A son was born to Mr. and Mrs. Jerry Cherry last Thursday in the Basano Hospital.

The school fair-trees were distributed among the children of the Colony on Saturday last. They are busy planting them now.

A dance was held in the Gem school Friday last, and a very enjoyable evening was spent by everyone. A volunteer orchestra supplied the music.

Miss Fie and cousin Irene spent the week-end in Basano, and Mrs. J. Gray.

Fishing in the big lake has begun again.

Mr. and Mrs. Roy Robson and baby were back in Calgary at Sunday, May 8. Selfridge's home.

There will be a U. F. A. meeting in the Gem school Saturday, May 10, everybody come.

The water was turned in the north basin canal on Tuesday. Irrigation will soon commence.

Wm. Caldwell spent a few days during the past week at his home in Gem.

The community dance in the Gem school Friday, May 10, the Peppy Four Orchestra will supply the music. Everybody come and be sure of "one big night." Don't forget the date.

Rosemary News

ROSEMARY, May 8.—Mr. and Mrs. J. L. Young had as Sunday guests Mr. and Mrs. F. A. Gellings and family.

Sam Talkington has been in the Colony several days this week.

Mr. and Mrs. J. McNeil were dinner guests Sunday at the home of Mr. and Mrs. Harry Morgan.

Mrs. Stanton, of Duchesne, called on Mrs. Ramer Thursday.

Mr. and Mrs. L. Young were Brooks visitors last Friday.

Mrs. P. Krause was a Monday afternoon caller on Mrs. Roy Eastman in Basano.

Mrs. A. L. Gelling is kept very busy these days taking care of a thousand baby chicks. They are mostly of the White Leghorns.

Mrs. Harry Ankrum spent Monday with Mrs. E. Simmons.

David Osborne, of Medicine Hat, is expected to arrive the last of this week to take charge of the services in the Union Church for the summer.

Mrs. J. McNeil is spending this week in Brooks.

Gem Will Hold
Second School Fair

Prize List to be in Readiness in a
Few Weeks' Time

Preparations are under way for the second annual school fair to be held in Gem. The date of the fair has not yet been set.

Gem's first school fair was held last fall, and it was a very successful affair. Schools represented at this fair were Gem, Countess, Rosemary, Basano, and several schools from the north side of the Red Deer river. It is expected that this year the fair will be even more popular and a long list of entries is expected in the various competitions in school work, art, sewing, cooking, agriculture and livestock.

Some delay has been met in the preparation of the prize list, but it will be ready in a few weeks' time.

**AUTO PRODUCTION IS
HALF OF LAST YEAR'S**

OTTAWA, May 7.—The Dominion Bureau of Statistics at Ottawa reports that the production of automobiles in Canada during the month of March numbered some 20,720 cars. This amount was just about half of the total number of cars manufactured in the corresponding month of 1929.

Reports from the customs show that 3,505 cars were imported into Canada and 6,420 cars were exported during the same month. Of the total output during March, 16,244 cars were made for sale in the country, and 4,486 cars were intended for export.

FARMERS WILL
CONVENE HERE
ON MAY 10th

Candidate to be Chosen in Contest
How Valley Constituency—
Doubt Clouds Possible Choice

It Other Parties Remain
Inactive

PREMIER BROWNLEE WILL ADDRESS
PUBLIC MEETING
AFTER CONVENTION

The wheels of politics are beginning to turn in How Valley constituency. Two parties, the U. F. A. and the Liberals, will place their candidates in the field. The Conservatives are remaining quiet, and it is doubted in some quarters that they will contest the How Valley seat.

U. F. A. to Convene Here

The Farmers party will hold their convention in Basano on Tuesday afternoon, May 10, in the Masonic Community Hall. A candidate will be chosen at this gathering, but who the U. F. A. favor will be seen in the future.

It is believed by many that Ben S. Plummer is the U. F. A. candidate in the local provincial election. Mr. Plummer is now in Ontario, and no one has any information regarding his views or plans. Popular opinion seems to favor Mr. Plummer for first choice. In the event of his refusing the nomination the choice will be between W. R. Schending, of Huxar, and J. M. Wherry, of Chancellors. Both these men have been active in U. F. A. affairs for many years.

Many farmers want J. A. Maynard, of Card, to be their candidate to go before the convention as a candidate for nomination.

Brownlee Coming

Following their convention in the afternoon of May 26, the farmers will elect their delegates for the evening. Premier Brownlee will attend this meeting and address the people on matters of immediate interest. This is an opportunity to the electors of the province.

Will be Liberal Candidate

The Liberal party has not yet made any plans for their convention, but prominent Liberal declare that How Valley will be contested by a Liberal candidate. When the Liberal leader will be a matter of conjecture, but it is expected the Liberal plans will be put into action within a very short time.

So far as can be learned the Conservative party has as yet taken no steps concerning the coming election as far as How Valley is concerned. Doubt has been expressed that they will even contest the seat.

Play Shows How
We All Tell Lies

"Nothing But the Truth" Will Be
Given First Showing Friday
Night, May 9

Nobody likes to be called a liar, but it is a fact that we all tell lies. "Nothing But the Truth," or "The Lie," this picture seems to be a necessary evil to prevent quarrels, arguments, and the breaking of friendships, and to keep the social machine running more smoothly in order that life may be pleasant.

When we start telling the truth and nothing but the truth, we are bound to get into trouble. Young Bob Bennett found that out, he ran into trouble and plenty of it when he made a bet he could tell the truth for twenty-four hours. He won the bet, but it was the most nerve-racking experience of his life, and it nearly ruined him.

That is the brief outline of the comedy, "Nothing But the Truth," which the Basano Players will present for the first time on Friday evening this week, May 9, in the Masonic Community Hall.

If you don't believe a man telling the truth sounds funny, just come and see this play. It will laugh and laugh often, at the humorous situations, the domestic complications, and the mirth-provoking "truthful" remarks in this play. Perhaps, too, you will sympathize with Bob Bennett when he finds that truth telling is not such a simple matter after all.

The Red Rose Tea guarantee means what it says. If not satisfied return the unused part in the package and the grocer will refund your money.

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

In the best package—Clean, bright aluminum

The West Helps the East

The reduced volume of wheat production in Western Canada last year coupled with the serious tie-up in grain shipments owing to the absence of a profitable export market, has at least had the effect of opening the eyes of Eastern Canada to certain facts which formerly they did not realize, or at all events were loath to admit exist.

For a long period of years, even in fairly recent years, the opinion was voiced throughout the eastern portion of the Dominion that the West imposed upon a drain on the East, that the East was taxed to provide immigration, transportation, and other services for the West, and for which the East received no adequate return.

Now, apparently, this view is no longer held, for we find such an outstanding Ontario paper as "Toronto Saturday Night," which more or less reflects the financial viewpoint of the city in which it is published, featuring an article which opens with the following paragraph:

"Behind the dark curtain of wheat, the emphasis which has been placed on failure of the last crop to move, the controversy over marketing methods with the resultant propaganda, is to be found the true economic status of the Canadian wheat. A clear and unbiased examination of the facts, the facts alone dissociated from the passionate and factitious contention, is offered to east and west alike. Upon such knowledge only can the confidence of the manufacturers in his commitments for the summer and fall months of the year be founded. There is no disputing the fact that the distance between production and a national volume of trade tends upon the West's purchasing power."

The admission or recognition, contained in that last sentence is certainly refreshing, and welcome to the people of Western Canada. It recognizes by the East most undoubtedly mean the rapid development of a better understanding between the east sections of the Dominion which lie to the east and west respectively of the Great Lakes. And such better understanding is vital to the welfare of Canada.

The second fact which the experiences of the past twelve months have brought forcibly to the attention of the whole country is that the volume of freight trade produced by the transportation system of the Dominion, in grain shipments of the prairie provinces is an important, yes a vital factor. In maintaining their net profits at a satisfactory high figure, not so long ago, the railway managements contended that rates for western grain carriage fixed by the Railway Commission were so low that there was no margin of profit for them in this class of business, that in fact, there was a loss taken in the movement of western grain, which loss had to be made up out of other earnings. This, therefore, also constituted something of a grievance in the eyes of eastern shippers.

Now, however, both railways have frankly attributed the drop in their profits, in not merely the gross but the net profits, to the heavy decline in grain shipments. In other words, they have admitted the profitable nature of the western grain business from a railway transportation standpoint.

These things are deeply significant. It is well known that freight rates on grain in Western Canada are much lower than they are on railways in western grain areas of the United States, and to that extent the Western Canadian farmer has an advantage over his United States competitor in world markets. It is, however, gratifying to know that such advantage is not gained by imposing actual loss upon the transportation companies of this Dominion.

To the West, too, it is gratifying to know that it is a vital factor in promoting the prosperity of the manufacturing industries of the East. That is as it should be. The West desires to help Canada forward. It is anxious that the settlement of its broad acres and the fertility of its soil should result in big and profitable business for the East. The West prefers Canadian-made goods above all others, and it is a source of real gratification to our people to realize that we have in it our power to confer the benefits of increased business and prosperity upon our fellow Canadian citizens east of the Great Lakes.

Out of the tribulations times and somewhat bitter experiences of the last season there has come the happy realization, both east and west, of our dependence on each other in the progress and prosperity of the Dominion as a whole, in our joint pride and concern in the progress and prosperity of our common country.

Restoring Post-War Rivalry

"Kiel Week" was before the war, one of the greatest events of the year, bringing all nations together in peaceful rivalry. For the first time in seventeen years Germany's North Sea regatta, which is to be held from June 5 to 12 will have English yachtsmen among the competitors, as well as Swedish and Dutch. This is Germany's greatest high-seas sporting event and it is this time being anticipated with more than usual interest.

The loss to the world each year by rusting is said to be more than \$2,500,000,000.

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines. Ailment kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your uneasiness will promptly and pleasantly disappear in five minutes. Then you will always know what to do. Crude and harmful laxatives will never appeal to you to prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia, prescribed by physicians for 50 years in correcting stomach acids. Each bottle contains full directions—any druggist.

Fingerprints Are Radioed

Photographs. Also, Exchanged. Between Berlin and Buenos Aires

The police of Berlin and Buenos Aires have successfully exchanged photographs and fingerprints by radio.

The prints of a criminal's ten fingers were sent in eight minutes and were received with a clearness which readily permits indexing and identification.

The radio transmission of photographs, however, has not yet been so successful, but pen and ink drawings from photographs can be transmitted perfectly. Berlin radioed to Buenos Aires a sketch of its chief of police, and Buenos Aires sent a sketch of its chief of police to Berlin. Both were reproduced excellently.

RHEUMATIC VICTIM FOR SIXTEEN YEARS

Dr. Williams' Pink Pills Restored Her Health

Rheumatism is a disorder of the blood. Cold, wet weather may aggravate it but that is not the cause. The blood is impure, and uric acid is the reason. Re-build the blood and purify the blood.

Mrs. John C. McPherson, 24 Mary's, Ont., writes: "For sixteen years I was a victim of rheumatism. For eleven years I was unable to walk. Massage and other medical treatment failed. I was utterly discouraged. Then I read of Dr. Williams' Pink Pills. They were recommended to me by a friend. I bought a box and in a few weeks the pain lessened, my appetite and color improved. I am now able to do light housework. It is wonderful what Dr. Williams' Pink Pills have done for me."

Dr. Williams' Pink Pills do one thing but they do it well. They enrich and purify the blood. This rich blood banishes rheumatism, restores vitality, builds up the system and promotes health and strength. The Pills are sold by medicine dealers or by mail at 50 cents per box. Dr. Williams' Medicine Co., Brockville, Ont.

No Moths in Arctic

Woolen Mittens Severe, Eight Years Old Are Like New

"Arctic huts are unknown in the North. Let a pair of white woolen mitts, hanging in the office of S. R. Finnie, at Ottawa testify. Mr. Finnie is director of the Northwest Territories and Yukon Department of the Interior."

They were knitted these mittens in Canada, 50 or 60 years ago. A bundle of them was purchased by the outfitters of Captain Sir Leopold McClintock, commander of the expedition that sailed in 1858, and the ships that went north in search of Sir John Franklin.

They were fastened up in a cask and cached on Devon Island, in 1852, exactly 78 years ago. Last spring, Inspector Joy came into the mittens, and he found them. They are back in civilization, and look like new.

Persian Balm tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Safeguards and beautifies the complexion. Creates complexion of exquisite charm. Eliminates the faintest blemish. Invaluable for softening the hands and making them beautifully white. Cool and refreshing. Delicately fragrant. Delightful to use. Used unobtrusively by all women who care for feminine distinction.

Fair Booklet Issued

Under the title "Hints for Exhibitors," the provincial department of agriculture has issued a booklet that deals with exhibits and the preparation of exhibits for the World's Grain Exhibition and Conference that will be held in Regina July 25 to August 6, 1932. Copies may be secured by applying to the department. Hon. W. C. Burke, Minister of Agriculture, is chairman of the executive Saskatchewan committee.

How the Sprain with Minard's

Establish Reference Monuments. During the summer of 1929, the Geodetic Survey of Canada, Department of the Interior, established fundamental reference monuments in fourteen towns and cities of Saskatchewan and Manitoba. The sites, usually in improved city parks, were granted by the municipalities. Each pier bears a bronze plate on which is inscribed the elevation, latitude, and longitude of the monument as surveyed by the Geodetic Survey.

An Odd Ornament

A human jaw bone carved with hieroglyphs and made into a pendant is an odd piece of jewelry worn by one of the prehistoric Mayas and recently recovered by a British archaeological expedition to British Honduras.

The straight and narrow path is also slippery.

Children's Croup Colds Quickly Relieved

Take a saucup or pitcher of water; place it on a spirit stove or lamp. Add half a teaspoonful of Calathosone to a pint of water which is brought to a boil. Let the steam from the kettle fill the room so that medicated air is breathed in by the child. The distressing cough is relieved. The inflammation is reduced. Good results are quickly noticeable in using Calathosone in this manner. Even for small infants this treatment will do. Every good druggist sells Calathosone in 50c bottles.

Lives Have Been Shortened

Men Who Saw Actual War Service Are Dying Prematurely

Young Hon. Dr. Manion, speaking before the parliamentary committee on pension and returned soldiers problems the other day, made a statement which is highly significant.

He said that of those men who served in an actual theatre of war between 1914 and 1918, very few will live to reach the age of sixty-five. He said that a physicist and a war veteran, Dr. Manion has some intimate knowledge of the conditions under which men lived during these war years, and of the effect which these conditions had on mind and body. And his considered opinion is that few of them will come within five years of reaching the allotted span of three score and ten years of life.

This statement is further amplified by the figures quoted by Major Wright of the personnel department. His figures showed that 34,000 Canadians reached an actual theatre of war. Of these some 60,000 were killed in active service. Of those who returned to Canada, however, 29,376 are known to have died since the war. There may be many more who have died since that time, but there has been no record, but the records available show almost 30,000 deaths in the first ten years after the war of hostilities.

This is a condition with pondering. The war veterans of Canada are doing one of the greatest and it is only logical to expect that the rate of mortality will increase rather than decrease during the next decade and the one to follow. Indeed, Major Wright's figures rather support the assertion of Dr. Manion that few of the war veterans will reach the usual theatre of war will reach the age of sixty-five.

This is not a very cheerful outlook for the veterans. Yet it is recognized that war conditions were such as to prematurely age many of them and to rob them of the strength and vitality that would carry them on to the natural span of life. Their lives have been shortened by their service to their country. Their earning powers have been curtailed because they are growing old and unable to do their work. Their lives are shorter, and they are in a difficult situation, and one in which they merit all the sympathetic consideration that can be given them by a grateful people. Ontario Times.

A Giant Tree

A giant spruce, more than 275 years old and measuring 125 feet in height, has just been cut down in Gashua park in Vermont. At the base the ancient tree had a diameter of 44 inches. It was sawed into five sections, containing in all more than 118,45 cubic feet of solid wood and plenty of splints for making pulp.

Praises This Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief. Though for thirteen years he had sought other help, his condition was suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple. It cost is slight, and it can be purchased almost anywhere.

Prizes For Registered Grain

To encourage the growing of registered grain, the Melfort, Sask. Kiwanis Club is to supply 25 teen age boys with two bushels of registered seed each, or enough to sow an acre of land. A cup and other prizes will be presented in the fall for the best grain.

Production and the Market

Dairy Products and Livestock, Could Be Increased To Canada's Advantage

While Canada has been increasing her wheat acreage at the rate of a million acres a year every other major line of agricultural production has been standing still or sliding down hill. While wheat crop goes begging the British market is calling in vain for more Canadian Withbires, more Canadian cheese, more Canadian condensed milk and more Canadian poultry products. The simple fact is that agriculture in this country has grown all out of balance.

This is the argument of R. D. Colquhoun, in an article in "The Country Guide," Winnipeg, and there is plenty of evidence to support his contention.

What has happened is that Canada's agricultural production has grown, completely out of balance. We have a national deficit of two such important products as butter and lamb. Our Withbires exports are at the vanishing point. It would be no surprise to some of us with a taste for New Zealand lamb on the meat counters of our cities if a change in the production of these commodities and other products were selling less abroad every year. This kind of thing can not go on forever, says Mr. Colquhoun. Production has to be shaped to fit the market. We have got to balance up. Otherwise the figures at the bottom of the column will be written in red ink.

These considerations, however, must not blind the observer to the fact that wheat growing is the chief business of large areas in the West because these areas are adapted to the production of wheat and mixed farming areas.

Douglas' Egyptian Liniment is unrivaled for speedy relief in muscular rheumatism, lame back, inflammation, burns and felons.

Plan During Venture

Group of Japanese Business Men Sponsoring Air Line Across Pacific

A project of inaugurating a regular passenger and air line between Japan and the United States and Canada to shorten the distance between the continents to three days in reported to have been organized by a group of Japanese business men and financed at a capitalization of \$75,000,000. Four huge airplanes, resembling the Graf Zeppelin, which encircled the globe last year, are expected to be employed for the regular air trip.

The Japanese government has been officially asked for the necessary permits and those behind the enterprise they propose to go right ahead with their preparations.

Seki Hoshino, noted Tokyo business man and one of the promoters says the plan was projected last year shortly after the visit of the German dirigible. The single fare for a passenger would be \$1,000.

"It may take us a year or two to complete organization," said Mr. Hoshino. "International agreement will have to be negotiated. But we are absolutely sure in this undertaking. It is a daring venture, but we believe that it is feasible and are prepared to go right ahead with it."

Campers Carry Minard's

Canada's Scholars

Latest government figures show that of 1928, show nearly two and a half million scholars in Canadian educational institutions, or 2,542,391 in exact figures, of whom 2,054,298 attended publicly controlled kindergarten, elementary and secondary schools. The attendance at the 23 universities in Canada was 55,942 of whom 20,900 were women.

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence who is infested with worms can take this preparation without a quiver of the tongue and with a sure relief and a full protection from these destructive pests, which are responsible for much disease and great suffering to legions of little ones.

Not so many years ago, farmers regarded meet clover as a permanent weed; now they cultivate it for hay and pasture and to improve the soil.

One advantage the Senators will enjoy now is that for whatever happens they will have a woman to blame it on.

Don't worry when you stubble remember, a worm is about the only thing can't fall down.

Used-car auction sales are being held in Africa.

When Babies Suffer

There are times when a baby is too fretful or feverish to be sung to sleep. There are some pains a mother cannot pay away. But there's no time when any baby can't have the quick comfort of Castoria! A few drops, and your little one is soon at ease—back to sleep almost before you can slip away.

Remember this harmless, pure vegetable preparation when children are ailing. Don't stop its use when baby has been brought safely through the age of colic,

diarrhea, and other infantile ills. Give good old Castoria until your children are in their teens! Whenever coughed tongues tell of constipation, whenever there's any sign of sluggishness to relieve, Castoria is pleasant-tasting; children love to take it. Buy the genuine—with Chat. Fletcher's signature on wrapper.

Average Lifetime In India Very Short

Record For New Zealand Is Highest In World

The country which leads the world in the average lifetime of its people is not in either Europe or America, but in New Zealand, where at the beginning of the decade, a male child at birth could look forward to 63 years of life and a female to over 65 years, according to the statistics offered by Louis I. Dublin, in his article "Can We Extend the Life Span?" in the May number of Harper's Magazine.

In Australia the expectation of life is but three years less, but is, nevertheless, higher than that of any country in either America or Europe. At the other end of the scale stands India, where the expectation of life reaches the amazingly low figure of 22 years for males and 23 years for females, a figure about equal to that of the people of Rome under the Empire.

In the United States the expectation of life is about 59 years, being a little less than that figure for males and a little more for females. There has been an extension of 9 years between the years 1900 and 1927. In Europe Denmark has the best standing as shown by the fact that its men may expect to live a little over 60 years and its women about 62 years.

Carlson Collection For Zoo

Deer only 2 feet high, giant frogs, birds which resemble turkeys and have spurs on their wings, lears which lay blue eggs, and wild dogs are among a curious collection brought from South America for the London Zoo by Mr. Clarence Elliott, the scientist.

A black surface will absorb as much as 95 per cent. of the light thrown upon it.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time when you use them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in the "Centre Pull" Packs.

HAMILTON, ONT.

Western Representatives:

HUNTER-MARTIN & CO., REGINA, SASK.

British Preference Has Been Increased Through Revisions In New Budget

Ottawa, Ont.—Hon. C. A. Dunning, in his first budget speech, today announced that the sales tax reduced from two to one per cent.

Downward revision of the tax brought in the last year on the sale and transfers of stock.

Duty on New Zealand butter increased one cent to four cents a pound.

Trade agreement now in operation with New Zealand will be terminated on October 12.

Trade agreement with Newfoundland to be announced soon.

Long list of tariff changes.

Increases in the general tariff on steel plate and structural steel, with duty lowered under British preference.

A countervailing duty to make Canadian tariff same as country of export on certain commodities, including certain vegetables, eggs and grain.

Ottawa.—An estimated surplus of \$4,507,000 for the fiscal year 1929-30 was announced by Hon. C. A. Dunning, Minister of Finance, in his budget speech.

Together with this announcement came the important statement that "numerous and complex" changes in tariff rates are provided for.

Summarized briefly, the Minister told the House that the present budget tariff proposals involve, under the general tariff, increases in rates on 54 items and decreases on 46; under the intermediate tariff, increases in rates on 35 items and decreases on 18; and under the British preferential tariff, increases in rates on 11 items and decreases on 270.

When the revision is completed, the Canadian customs tariff will consist of 1,184 items, of which 589 will be free under the British preference.

The changes proposed, the Minister stated, will have the effect of greatly increasing the British preference in the Canadian market.

The scene as Mr. Dunning made his statement to the House of Commons and the Dominion of Canada was tense with dramatic interest. On the floor of the House nearly every seat was filled. Galleries were packed. For weeks the word had gone forth that this would be the most far-reaching budget in a decade. It was referred to as an "election budget"—the announcement on which the government proposed to stake its political life. Long before the bill throughout the parliament buildings summoned members to their seats, impatient crowds gathered outside the public and private galleries of the Commons chamber. Many women were there. They waited while the usual routine of prayers was gone through. Then the doors were thrown open and they flocked into the galleries.

Must Take Livestock Industry Seriously

Or Canadian Farmers Will Lose Business, Says Cattle Man

Winnipeg, Man.—Canadian farmers must look to their livestock properly as a serious industry or they will have it taken away from them, declared Col. H. A. Mullins, former member of Parliament for Marquette and one of the best-known cattle men in the Dominion here.

Just as big packing companies in the United States have undertaken to raise their own cattle, Canadian firms will be forced to do the same thing if farmers fail in this country as they have done elsewhere.

In Montana, Col. Mullins said, abattoir companies are feeding \$2,000 worth and nearly 3,000 cattle.

Manitoba Seeding Nearly Done

Winnipeg, Man.—Seeding of wheat is about 80 to 85 per cent finished in Manitoba and present prospects are favorable for early sowing of the entire grain crop, according to a summary issued recently by the Manitoba department of agriculture. A large number of farmers have all their wheat sown and are proceeding with the planting of their other crops.

Railo Stations To Fight Fires

Port Arthur, Ont.—To aid in forest fire battles, two radio stations will be operated from subterranean points in the Thelon area during this season. Communication will be established between observation towers and the chief ranger's headquarters.

W. N. U. 1636

PRIME MINISTER PROPOSES NEW FISHERIES POST

Ottawa, Ont.—Prime Minister Mackenzie King has given notice of a motion providing for a new Minister of Fisheries. Another motion standing in the name of the Prime Minister on the order paper declares that it is expedient that there shall be a new Department of Fisheries. The salary of the Minister of Fisheries is set at \$10,000, which is identical with that of the other Cabinet ministers.

The impression prevailing in political circles is that creation of the new portfolio will give Prime Minister Mackenzie King a new ally in the cabinet. Since 1928, that province has been without ministerial representation, but it is recalled that at the time of the formation of his last cabinet, four years ago, the Prime Minister intimated that a minister from Prince Edward Island would be added. It is stated, however, that the government is considering the question whether to give the province representation through the new department of fisheries or through another department by the shuffling of portfolios.

Hon. J. E. Sinclair and J. R. Jennings, both Liberal members for the constituency of Queens, and A. McLean, Liberal member for Prince Edward Island, are mentioned for possible appointment.

Another name prominently associated with the appointment is that of Dr. Cyrus MacMillan, a professor at McGill University and former Minister of Fisheries. Dr. MacMillan was a member of the Atlantic Fisheries Commission.

Creation of a separate department of fisheries with a minister and a deputy presiding at its head was recommended by the Duncan Royal Commission, which investigated conditions in the Maritime Provinces back in 1925 and 1926. About a year ago, W. A. Pound was appointed as Deputy Minister of Fisheries to carry on such duties under the Minister of Marine and Fisheries, Hon. J. A. Cardwell, until the new department is organized.

Another legislative proposal bearing on fisheries is for the transfer to the new department of Fisheries of manufacturing purposes, competition of steel and the like. This task is now being performed by the Department of Agriculture under the Inspection of Fish Act.

It is contemplated also to increase from five to seven the number of appointments which may be made by the minister of fisheries to the Biological Board of Canada.

The purpose of the change is to give an additional representative to the fisheries industry of both British Columbia and the Maritime Provinces.

A Royal President

London, Eng.—The Prince of Wales has consented to become president of the Professional Golfers' Association, succeeding the late Earl of Balfour. The Prince always has taken a great interest in golfing and besides has held the royal and ancient captaincy has been captain at various times of several metropolitan clubs.

AN INTERESTED SPECTATOR

This photograph shows Stanley Baldwin (left), former prime minister of Great Britain, smoking what looks like a "Dewey pipe" with the Cambridge crew team at Putney Regatta. In preparation for the classic Thames boat race, which was won by the light blue of Cambridge.

DEFENDS MARSHALL FOCH

Open Office At Canadian Post

Raymond Foch, former premier of France, has taken up the pen to defend Marshal Foch against the criticism of Clemenceau's "Grandeur and Misery of Victory."

Japan Chooses Vancouver

First Trade Commissioner Arrives To Open Office At Canadian Post

Vancouver, B.C.—Japan has appointed its first trade commissioner to Western Canada in the person of Masao Suma, who has arrived in Vancouver to open an office here from which he will seek to stimulate Japanese trade with Western Canada and the Northwestern States.

"There are busy ports in the American part of my territory," Mr. Suma said, "but the fact that the Japanese government has selected Vancouver as the site of the office indicates the importance that the country attaches to the growing trade with this port."

Japan now has diplomatic, consular and trade representation in Canada. The trade commissioner will work in co-operation with the consular service, Mr. Suma said.

The volume of trade between Canada and Japan has increased two-fold in the past 20 years, the new trade commissioner said.

Last year Canada's imports were \$13,000,000, and her exports to Japan were \$43,000,000, making a total volume of trade of \$56,000,000, or twice as much as in 1919.

Britain To Establish Four Regulations

Minimum Percentage Of Domestic Flour Required For Each Loaf

London, England.—The British Government has definitely decided to establish regulations requiring a minimum percentage of British wheat flour in every loaf, milled in Britain, according to the agricultural correspondent of the "Daily Express" to day. The newspaper adds the minimum will be varying not a fixed figure and that the government's policy will be published in the form of a government "white paper."

May Amend Fines and Drugs Act

Ottawa, Ont.—Hon. J. H. King, minister of pensions and national health, introduced a bill to amend the Food and Drugs Act in the House of Commons recently. This provides for analysts who are employed by the provinces and who are not members of the department staff to be designated "Dominion Analysts" who so employed.

Manufacturing Is Increasing On Prairies

All Three Provinces Are Sharing In Rapid Development Of Industry

Winnipeg, Man.—Progress of the manufacturing industry of the prairie provinces during the past year was testified to by C. E. Harvey, of Winnipeg, retiring chairman of the prairie provinces branch of the Canadian Manufacturers' Association, at the annual meeting here.

Mr. Harvey said many new factories came into production on the prairies last year, the value of products produced in 1929 totaled more than \$50,000,000, and all provinces, Manitoba, Saskatchewan and Alberta—shared in the development.

Saskatchewan, famed as a wheat producing area, can now also lay claim as a manufacturing province of importance, said Mr. Harvey. Last year the manufacturing industries of the prairies distributed a pay-roll of more than \$75,000,000, and the general public are rapidly coming to the realization that factories have a definite value to the community. Industrial workers create a "home market."

Amendment Was Defeated

Move For All-British Beer Voted Down In House

London, England.—The Conservatives lost their fight in the House of Commons for all-British beer. They had two amendments to the beer tax bill, but Mr. Martin believed that a large business in this line can be built up. The need of extensive advertising to compete with huge American exports is stressed. Officers of the department will confer with the fruit, vegetable and canned industries in an effort to take advantage of these possibilities in a big way.

Under the combined Liberal-Labor vote the first amendment failed an adverse majority of 131. The second scored an adverse majority of 128.

DISCUSS BONDING OF COMMISSION GRAIN BUYERS

Ottawa, Methods of protecting farmers from defalcations of commission grain buyers were discussed in the House of Commons Committee on Agriculture. It was pointed out that shrewd operators were fully bonded to protect persons who stored grain with them. In the case of commission merchants protection to the same extent was not afforded.

The question was raised during a discussion of the new Grain Act by Hon. H. H. Stevens (Cons. Vancouver Centre), who thought there should be some provision in the act for bonding of commission merchants.

E. R. Ramsay, chairman of the Board of Grain Commissioners, whose commission men might be put out of business if they were required to put up higher bonds than now.

It would be as whether commission merchants served any useful purpose was expressed by E. J. Garland (Cons. Winnipeg Centre). He said the business was dying out, and wondered if the services performed by these men to the trade compensated for the losses sustained through their occasional defalcations.

The commission men were an important factor in competition with elevators, said Mr. Ramsay. Their operations acted as a curb on the tendency of elevators companies to increase their charges.

In this case, Mr. Garland said it might be a good thing to raise the bonding requirements. Then those commission men who were able to make a profit from the business could still carry on and the farmers would be protected. He said that strict penalties are provided in the new Grain Act for branches of its provisions respecting commission men. A penalty of not more than two years imprisonment or a fine of not more than \$5,000 on indictment is provided for any person who buys, sells or arranges for the weighing, inspection or grading of western grain for reward without a license from merchants or grain dealers' license.

Some discussion arose about this section, particularly a clause placing the burden of proof of innocence on the accused. Some members thought this was too severe and Mr. Stevens opposed the general principle of British jurisprudence. The committee has almost completed its report on the bill. It is expected that the bill will be introduced and will be taken up at later sittings.

Progress In Legislation For Return Of Natural Resources Is Being Made

Good Market In Orient For Apples

Up Big Business

Victoria, B.C. Plans for invading Oriental markets with British Columbia apples are being shaped by the provincial government through the marketing branch of the department of agriculture. Following the receipt of advice from Hon. Herbert Markham, Canadian minister to Japan, pointing to the possibilities of this business.

A large market exists for the fruit in Japan and China, Mr. Markham said, and the department is anxious that the fruit industry take advantage of these opportunities.

The impression made by experimental shipments from here to large markets like Hong Kong, has been excellent, Mr. Markham stated, and should enable Canadian growers to sell large quantities there in the future.

The department is also anxious to promote the shipment of canned fruit and vegetables to the Orient, and Mr. Markham believes that a large business in this line can be built up. The need of extensive advertising to compete with huge American exports is stressed. Officers of the department will confer with the fruit, vegetable and canned industries in an effort to take advantage of these possibilities in a big way.

Start Work On Branch Lines

C.P.R. Extending Two In Saskatchewan And One In Alberta

Winnipeg, Man.—Contracts for building and grading have been started on three additional branch lines of the Canadian Pacific Railway, covering 145 miles in Saskatchewan and Alberta. It was announced. These affect the Scott Creek locality, 25 miles southeast from Lumsden, the Lethbridge-Meadow Lake portion of the Prince Albert and Lake of the Woods line, 60 miles west and north-west, and a branch of 30 miles west and south from Croftland, a spur from the Calgary-Edmonton line.

These new sections of railroad will provide transit facilities for grain and freight into some of the richest agricultural areas now under settlement, and will give encouragement to farmers already settled in the areas affected. With the letting of contracts men were immediately set to work at the process of grading, still further relieving the unemployment pressure.

SUNDAY SCHOOL LESSON

JESUS ACCLAIMED AS KING

Golden Text.—"Hosanna to the Son of David." Hosanna is the word for praise in the name of the Lord. Hosanna in the highest.—Matthew 21:9. Devotional Reading, Hebrews 1:12.

Explanations and Comments

Preparations For The Triumphal Entry, 21:1-6. When Jesus entered with Him approached a throng of people. They were disciples on ahead to make preparations for entering the city, but they found in the village an ass and a colt with her, which they went to bring to Him. If the owner objected they were merely to say, "The Lord hath need of them," and he would send them. The horse was the symbol of war, the ass the fitting symbol of the Prince of Peace. The Triumphal Entry, 21:7-11. The disciples followed, instructions and brought the ass. They put their horse under the ass, for Jesus to sit upon, and the multitude with them spread their garments in the way and branched from the trees and spread them down for Jesus to travel over. "Some have ridiculed the idea of spreading branches on the road as a symbol of victory, and yet the orthodox custom in Russia, in a funeral procession, is to spread the route with branches of fir." W. A. Grist. Because of John 12:13, it has been generally supposed that the branches were palm branches, although John only mentions the fact that the people came out from Jerusalem to meet Jesus bearing branches of palm. We know from Revelation 7 that palms were carried as symbols of victory and rejoicing.

John tells us that many people, excited by the news of the raising of Lazarus (which he records), hurried from Jerusalem to meet and do honor to Jesus, while following with branches. This other multitude of Galileans on the way to Jerusalem to keep the Passover. But crowds united in crying, "Hosanna to the Son of David."

Here and There

(615)
The trans-Atlantic speed race
between the post-horned steamers
Saint John, was broken today
by the arrival at the latter port of
the Canadian Pacific liner Pacific
of York, after a crossing time of
Liverpool which took only 22
hours and 14 minutes. According
to local shipping men this is the
first time in the history of the post
that a crossing has been made in
under seven days.

Twelve thousand pounds of
beet maple sugar and syrup were
handled daily during the latter
part of April by the Canadian Pa-
cific Express Company to point
overseas, the Prairie Provinces and
Ottawa, constituting a new record
to be a record movement of this
commodity. Outside commercial de-
mand for this product arises on
the part of individuals who make
a practice of shipping it to rela-
tives and friends in the Old Country
and the west of Canada.

Close on six million dollars were
spent on new Brunswick roads
during 1929, being reconstruction
of 21 miles of main trunk high-
ways and 112 miles of secondary
roads. This is regarded as the
most extensive programme of
highway construction. Improvement
and maintenance ever undertaken
in the Province.

Desperate Moment
Mother: "Johnny, if you eat any
more cake you'll burn."
Johnny: "Well, pass the cake and
get out of the way."

Swill Society
"Your wife likes to go south every
year, eh?"
"Yeah. She loves to spend the
winter in the auto-gravure sections."

Our New Service Station

Is nearing completion, and we will soon have it ready for opening.

In our new service station the motorist will find us prepared to give him splendid service. Three gasoline pumps, our own private driveway, and convenient lines of air hose will eliminate lost time in waiting, and our tire department will be equipped to give quick action on tire repairs.

Motorists may be assured of the same prompt and courteous treatment we have accorded in the past.

BUILDING ALBERTA INDUSTRIES

For three consecutive years the Alberta Development Board, southern section, has been conducting a campaign to encourage the purchase of Alberta Made Products. Not only has this particular campaign been undertaken, but each year the Board advertises in a number of agricultural newspapers of the United States, pointing out the exceptional scenery of southern Alberta and the Rockies, stressing the advantages of land settlement in Alberta, and also, through the Dominion of Canada, bringing to the front the necessity and need of industrial development. Its efforts have been successful. New settlers have been directly traced, new industries have been established, and as for the number of tourists the Province has, it has definitely proved to be a result of the Board's advertising appeal.

It was interesting to note that at the annual meeting of the Alberta branch of the Canadian Manufacturers' Association held in Edmonton last month the association expressed on the public mind the importance of important portions of the province (including in its province). The membership in six years has grown from 50 to 240. The association's output has been consistently estimated at slightly more than \$100,000,000 in 1929.

This total indicates the importance of the manufacturing industry of Alberta. Much more than \$100,000,000 has been invested in manufacturing enterprises in this province. They are paying about \$100,000,000 a year in salaries and wages to over 10,000 employees.

It is becoming more apparent all the time that this contained prosperity of Alberta depends upon diversified development. The era of dependence on grain alone to produce revenue for the support of a growing population is a thing of the past. Agricultural activities will have to expand in other directions than wheat growing. Mixed farming, livestock production, and raising these will be used to ensure a more certain income for the farm, but side by side with these it is important that manufacturing should be encouraged as greatly as possible as well as the development of Alberta's great natural resources such as coal, gas, oil, and water power.

The citizens of Alberta should realize that not by grain alone can we live, but by the varied interests, agricultural and industrial can Alberta present a place where the citizen should support the purchase of Alberta Made Goods our prosperity will be more quickly assured.

SHOULD CLEAN UP THIS
Residents of Bassano were busy early this week in cleaning up the rubbish about their premises as part of the clean up campaign of the town council. The results are most gratifying, and the whole town now looks much neater and cleaner.

We have noticed, however, there are some spots in the very heart of the town that has been neglected. We refer to the old basement excavation near the post office. For a long time this hole has been used as a dumping ground for ashes and refuse, and it now presents a very unsightly appearance. The council should put a stop to the practice of dumping rubbish and ashes in this hole, and a little cleaning up here would be quite in order.

THE HAWKER AND THE PEDDLER
(The Hanna Herald)
With the recent decision to inaugurate a business tax in Hanna, citizens will have all the more reason to show loyalty toward the business man in their midst: the man who contributes directly and indirectly, day in and day out, to the growth and prosperity of our "house towns."
The hawker and peddler who exhibits his wares from door to door may tempt the thoughtless householder, but the man or woman who realises that no town would be worth living in if it were not for progressive business men, will give these birds of passage little encouragement.
"Be loyal to your own community" is a slogan of which every citizen should take heed.
The hawker and peddler has received encouragement in the hands of the Alberta Government, but the citizen who is loyal to his own town and community will discourage the door-to-door peddler of pants, printing, and prunes.
—The Hanna Herald.

With a prepared average greater by 21 per cent than that of 1929, better moisture situation and other indications promising general good conditions for the year, the Canadian West is now busy seedling, according to the latest report of the agricultural department of the Canadian Pacific Railway.

Nearly \$25,000,000 was voted by the Ontario Legislature recently for hydro-electric development work to be undertaken this year in the province for the Ontario Hydro-Electric Commission, a provincial government organization. Over \$12,000,000 is to be spent on the extension of the Niagara hydro system, upon which many millions have already been spent. It provides cheap electric power over a wide area of rural and urban territory.

"There is a very large amount of capital in England ready for investment and it is felt in that country that it should go to Canada," said Major L. A. Jones, economic editor of the London Morning Post, who landed recently at Saint John from S.S. Duchess of Albion, on a trip to Canada for the purpose of fostering better economic relations between the Dominion and the Motherland.

Four new game refuges adding 500 square miles to the extant 650 square miles of game sanctuaries in New Brunswick are to be established in that province for the purpose of preservation of the game supply according to information given out by Hon. Charles D. Richards, Minister of Lands and Mines.

Fish caught by commercial fishermen in Canadian waters last year had a value of about \$55,000,000. Over 100 countries bought fish and fish products from the Dominion in 1929 valued at \$18,000,000. More than 80,000 persons find employment in Canada in the fishing industry.

The wild rose is now the floral emblem of the province of Alberta. The provincial parliament has enacted the legislation making this flower, which grows so profusely all over Alberta, the provincial symbol. 'Blossom of the emblem was put up to the school children of Alberta and the wild rose captured most votes, with the tiger lily next in favor.

Homestead entries taken out through the Dominion Land Office at Edmonton during the month of March last broke all records for that month with a total of 277 homesteads and 19 soldier grants which compares with 230 homesteads in March, 1925, the previous record March.

Contrary to the general impression, Canadian investments in the United States are greater, per capita, than American investments in the Dominion. An official statement just issued shows that the average Canadian has \$100 invested in the United States and the average American about \$29 invested in Canada.

Something more than appearance will be necessary for grain to win a prize at the World Grain Exhibition and Conference to be held at Regina, July 25 to August 2, 1932. All entries getting into the prize money at this Exhibition will be inspected, be in demand for seed. It is because of the importance of the effect of the inspection of this prize seed to farmers in Canada and throughout the world that the Awards Committee has decided that the usual prize standards will be supplemented by a growing test, which in reality is the test of appearance.

The bull sale at Kamloops this year is scheduled for March 15 and 20. The show is becoming an important event in western livestock records. A big list of Alberta entries has been received.

The Maritime Livestock Marketing Board have extended their purchasing plan so that now farmers' clubs and associations may purchase feeds at a considerably lower price than formerly. Several carloads of feed have already been ordered.

The directors of the Canadian Pacific Railway have decided to apply to Parliament for an amendment to the company's charter permitting it to change the par value of shares of its ordinary stock from \$100 to \$25 per share with the exchange of one share of the old stock for four shares of the new. This action has been dictated by a desire to place the company's shares within the reach of investors of moderate means and thus increase the number of its shareholders, particularly in Canada.

Miss Doris Parkes, of Vancouver, became "Her Majesty" of the 1932 World winter sports carnival, following her election as queen at the recently concluded gathering at the famous mountain resort. She was spotted first from Calgary and Australia and was crowned amid colorful pageantry in the closing hours of the carnival.

To Live Well

The desire to live . . . at any cost . . . is as old as mankind. But the desire to live well . . . at reasonable cost . . . has never been so keen as it is today.

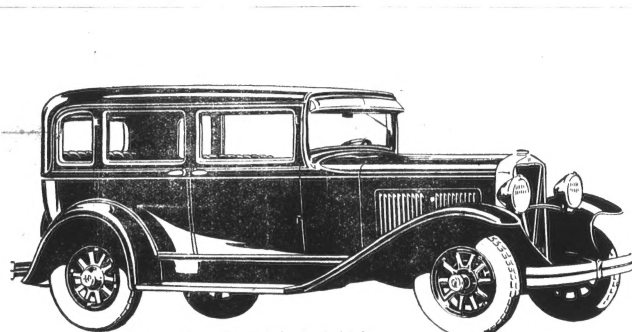

The one call for the mere avoidance of the dangers common to us all . . . but to live really well demands an alert, intelligent acquaintance with the improvements and refinements that are daily making life better worth living.

Through all the progress of the art of living well, advertising . . . almost alone . . . has brought the message of new pleasures, protections, and economies into every department of our lives.

And here before you, week by week, you will find reliable, straightforward news of tested ways of saving time, effort, and money.

Read the advertisements here in your newspaper . . . they are your guide to what is best and newest in the art of living.

From courtesy to world power is the record of Japan within the past fifty years, says Dr. Naoki Kame, Tokyo University professor and chairman of the Japanese National Committee on World Power Congress, here on a tour of Canada and the United States and a passenger aboard the Empress of Asia. He attributed the growth of his country to his progress in engineering.

The British bowling team which has played its matches in two leagues in the last two months, including five and winning eleven of the games, cited for England aboard the Empress of Asia recently. They came out to win the American Bowling Trophy, but the five games lost were in that event, and they must wait next year for another attempt.

Seventeen European races contributed songs, folklore and handicraft work while inhabitants of Labrador, the Arctic Circle, the Maritime, Pacific Coast, and Inland formed their songs to wards the brilliant success of the Great West-Luck Festival held at Calgary, March 19-22. The President of the province, the Premier and Governor and Dr. T. C. McManis, president, Western Union and J. M. Gibson, General Publicity Agent, representing the Canadian Pacific Railway, gave inspirational addresses in this effort to "Broaden the mind and create Canada's national consciousness."

Repercussions of Europe from economic effects of the war and the return of European nations to active and formidable competition in world production is being felt more and more essential for Canada and the United States to develop the vast potential markets of the Orient," said Louis Goulet, publisher of the New York Financial World, who sailed from Vancouver recently aboard the Empress of Asia for a tour of China and Japan.

Widespread interest aroused in the United States as well as in Canada by the musical programmes broadcast by the Canadian Pacific Railway on Friday evening, over its own transcontinental network, led to negotiations between the railway and the National Broadcasting Company of New York under which Canadian Pacific will supply WJZ and associated stations with a series of musical programmes made in Canada by Canadian talent. Five million receiving sets owned in a population of sixty millions will be reached by this extension which commenced first week of April.

Dairymen was a profitable industry in the three prairie provinces of Canada last year when its value totalled \$27,629,000. In eleven of the large exhibitions held throughout Canada during that year these three provinces were awarded eighty per cent of all first prizes in butter and 84 per cent of all prizes over half of which went to Manitoba.

According to a recent compilation made by the Canadian Government Bureau of Statistics, the average value of the occupied farm lands of Canada as a whole is \$100 per acre, as well as the dwelling houses, barns, stables and other farm buildings is estimated as \$32 per acre for the year 1922.

The first of the Canadian Pacific Railway broadcasting took place February 21, over C.P.A. from Montreal and K.W.M. from Toronto, and will be repeated every Friday thereafter. These stations were linked over Canadian Pacific telegraphs which allow the use of technical improvements brought into use for the first time. Running from 10 to 11 on the nights of broadcasting the concert will be made up of light symphony orchestra and recordings of light and ballad opera music. The service will be built up to the slogan of "Charter and Sound" and the orchestra will be under the leadership of Rex Battle, a conductor whose brilliant work had won wide popularity. One chamber music and French-Canadian and other folk songs will also be featured.

Appointment of L. C. McQuat, one of the Dominion's leading agriculturalists, as general agricultural agent of the Canadian Pacific Railway, announced recently, is further evidence of the railway's interest in the development of Canada. Mr. McQuat has had 18 years' experience in agricultural and livestock affairs and since the distinction of having represented Canada on an Imperial committee to study the meat supply of the British Empire.

Shoppers making the Royal York Hotel, Toronto, their Mecca next June for their Imperial Council session, will find a city ready built and equipped for 8,000 people at their service. The Canadian Pacific Railway are now building "Festival City" composed of railway sleeping cars and marquees to take the place of administration and service buildings. The new city will closely adjoin the Exhibition grounds where the convention is to be held. It will be divided by "The Midway" and its full length will be adorned with a motor road to be known as "Hemlock Drive." Streets numbered 1st, 2nd, 3rd, etc., will radiate from "Midway."

Churchill Now Experiencing Its Last Lone Winter Before Advent of New Era Next Spring

Churchill is in the child midst of its last lone winter. Except for some 20 men—and a single woman—every resident at the Government-owned, bay port has moved out to the district. The last scheduled Mackay Limited put out to the Mack in early December and now the mail is "mashed in" twice a month by dog team from Clifton, at Mile 327.

Included, the 250-year-old harbor is deserted until next spring.

A skeleton force at Churchill is retained by the Hudson Bay Railway which completed the first laying of track to the harbor 311 miles north-east of The Pas last March, and by the Department of Railways and Canals. But all railway construction and dock labor is at an end for several months. These men remain at the government road post, and one of the telegraph offices. The Hudson Bay Company trading post continues to work and Rev. H. A. Gibson and his wife reside at the Anglican Mission.

Otherwise the settlement at the mouth of the Churchill River, where 1,200 men fished last summer, is abandoned to the wild winds blowing down from the sea.

In all probability, however, the bay port of the West will not be known again so bleakly stretch to frozen autumn and spring. It is certain that the opening of the season to the public, planned for next spring, will mark the beginning of a new era at least partially permanent residence at Churchill. Indirectly, progress to the end of the Hudson Bay Railway will be closely scanned by the Dominion Government, but a new town will begin to take form when the way is opened to prospective settlers.

The fact that harbor roads to the bay is not expected to reach completion until sometime in 1931 will not prevent a hurried survey of new enterprises to Churchill. As the government ruling, three banking establishments alone have banked the arrival of commerce, numerous applications, however, for permission to set up establishments which might flourish on the trade of hundreds of residents living at the harbor, have been received.

Divers considerations, no doubt, have influenced the government's decision to supervise closely the settlement's early development. Housing accommodation at present is sufficient only for those housed at railway and harbor work, and under existing conditions, water supply and sewage problems yield to but temporary solution. When Churchill is under the status of a town, it is expected that these facilities will have been solved.

As a harbor, nevertheless, Churchill has not been sighted by nature before it empties into the sea. Churchill River lies in the shape of an oval bottle with its neck to the sea, a ready-made port. Besides, projecting headlands and an island shelter the opening so that storms have little effect on the inner harbor, enclosed as it is by rocky cliffs which rise in some cases to a height of 20 feet.

Along one side of the Churchill River runs the Hudson Bay Railway, reaching almost to the tip of a narrow point projecting out into the bay. It is at the base of this point, formed of rugged rock ridged by the years, that the townsite, no doubt, will be located, and it is on this side of the river that the government is constructing its harbor works.

According to the report of Frederick Palmer, British engineer retained by the Dominion Government in 1927, to advise regarding the suitability of Nelson and Churchill as harbors, the harbor capacity can be easily increased by a little dredging to accommodate as many and as large

Editor (to cub who seeks advice at inconvenient moment): "What are you doing now?" Cub: "That old job, sir." Editor: "Splendid. Make a bolt for the door, will you?"

Buyer—Give me a radio tube and a pick-axe.
Seller—Why, we don't carry those things.
Buyer—Then, you mean I have come to see if you could sell me a bottle—

W. N. O. 1931

Market For Saddle Horses

Alberta Horse Breeders' Association
Hold Annual Meeting At
Edmonton

Bright prospects exist in Alberta for the raising of polo and saddle horses, but the heavy horse trade is still depressed, fifty delegates attending the annual meeting of the Alberta Provincial Horse Breeders' Association at Edmonton, were informed by experts. President George Cresswell presided.

Steps taken toward organizing for the raising of high class light horses in central Alberta, were recounted by Col. F. C. Jamieson, following address by E. D. Adams, of Calgary, who described progress made by the southern provincial organization. Direct encouragement was extended for the establishment of a big horse breeding station by R. E. Wilson, federal horses promoter, who said the district might well extend east to Manitowish and south to Lacombe and

Edmonton. George Hoadley also stated that if a branch of the Canadian Hunter and Light Horse society were established, a grant would be made towards inspection and certification of breeding mares.

Here a motion must be taken by Alberta horsemen. The side of the machine age cannot be stemmed, declared Hon. George Hoadley. "All non-descript horses must be disposed of, and better bred horses raised. The horse population will be reduced to where there is only a netten good horses for every twenty demanded by the market."

Packing plants for canning of horse meat and making of horse bologna for export were planned to come to Alberta, said the minister. Orders for as high as half a million pounds of horse meat for the fox ranches of eastern Canada were received. It is a cheap, undried type of horse meat, disposed of, horse meat would again make its initial sale in the livestock industry, said Mr. Hoadley.

Mr. Wilson also spoke of the eastern horse market which had absorbed 40 per cent. more western horses during the previous year. Mr. Adams exposed the opinion that heavy horses will sell as low as \$60 but saying much more western horses will be sold in the coming spring. Heavy stock horses, there is no competition in that class, advised R. E. Cady.

Quality Is Higher

English Breeds Find Canadian Eggs Are Above General Level

"The consumption of eggs per person, per year in Great Britain is placed about 120, as compared with about 337 eggs in Canada. Relatively, therefore, the market is undeveloped and the explanation is the higher quality of Canadian eggs, which fill over 90 per cent. of our consumption, as compared with the one demand, as compared with the general level of quality of eggs in the 10 countries in which the British people are supplied." This statement was made recently by W. A. Wilson, agricultural representative for Canada in Great Britain.

The total imports of eggs by Great Britain, in 1928, Mr. Wilson advised, amounted to 261,674,100 dozen. The Empire supplied 58,862,500 dozen and from Canada 26,376,000 dozen. In addition the imports of eggs "not in shell" are estimated around the equivalent of 1,000,000 dozen. It is suggested a strict adherence to the policy of exporting only the best eggs and having those identified by stamping on each egg "Canada" instead of "Empire."

Forecasters Of Weather

Animals Can Tell Great Deal If You Know The Code

Most animals can tell you a great deal about the weather when you know the code, so to speak.

The household cat, for instance, is most useful. Should pass before a rain storm and playful, then it is time to look out for a first-class thunderstorm. Rain must be expected if puss has been soundly washing her face and keeps it up as if that is all she wants to do for the day.

If when you are out for a stroll, the horses pass neigh both loudly and insistently, it is time to make a dive for cover, for rain is not far off.

A rooster is indicated if you see cows lying huddled together with their tails to the windward early in the morning, when the beasts are generally sure to be feeding.

Saskatoon Tax Collections

Tax collections in Saskatoon went over the million dollar figure for the eleven months of 1929, not counting arrears and penalties, at \$1,049,485.23, an increase over \$70,030.97, an increase over 1928 of \$1,058,393.02. Out of total, 1929, of \$1,058,393.02. Last year after paying her world's record, she was placed by the Saskatchewan Government for \$10,000.

Canary Kornikie, Alaska, was awarded by King Kornikie, Dark Horse, as it is called, a gold medal cow, and has raised two sons and one daughter.

This Cow A Dairy Hero

13 Year Old Holstein Friesian Cow Is A World Beater

Canary Kornikie, Alaska, a 13-year-old Holstein Friesian cow, which a year ago claimed the world's championship as a butterfat producer with 25,336 pounds of milk containing 1,080 pounds of butterfat in 3,000 days, is now in the record books. Following her 1928 record this famous cow was the first to be named at a banquet in London, Jan. 13, 1930, held in honor of the Canadian Kornikie, Alaska, a 13-year-old cow, which produced 20,300 pounds of milk with 1,336 pounds of butterfat. Feeding in 1928, 1929, did not stop to rest and still early in her lactation period, and maintained a steady flow averaging well over 100 pounds a day for several months. Her best monthly production in butterfat was 114.60 pounds, produced in May with April 125.00 pounds, running a class second.

This cow was bred by Fred V. Hines, Jagsell, Ontario, and was in service from 1914 to 1929. In 1929, Mr. Hines advised, she produced 20,300 pounds of milk with 1,336 pounds of butterfat. In 1929, she produced 20,300 pounds of milk with 1,336 pounds of butterfat. In 1929, she produced 20,300 pounds of milk with 1,336 pounds of butterfat.

British Columbia Minerals

Mineral Production For 1929 Creates A New High Record

The gross value of the mineral production of British Columbia for 1929 creates a new high record, being estimated at \$70,030.97, an increase over 1928 of \$1,058,393.02. Out of total, 1929, of \$1,058,393.02. Last year after paying her world's record, she was placed by the Saskatchewan Government for \$10,000.

Canary Kornikie, Alaska, was awarded by King Kornikie, Dark Horse, as it is called, a gold medal cow, and has raised two sons and one daughter.

Canary Kornikie, Alaska, was awarded by King Kornikie, Dark Horse, as it is called, a gold medal cow, and has raised two sons and one daughter.

Buyer—Give me a radio tube and a pick-axe.

Seller—Why, we don't carry those things.

See? Not Half-Times, Goshen.

Color blindness is sometimes called "Deutschland," after John Dalton, English scientist, who discovered this abnormal condition.

Reproduce Hotel in Sugar

A large model in sugar of the great Canadian Pacific Hotel at Toronto. The Royal York, forty-two inches in height, has been made by Harry Atty, chief confectioner of the liner "Empress of Scotland." The model was exhibited at the Confectioners Exhibition, London, England, this month.

Forest Area Of Canada

Jack Pine Is Now Used Extensively For Railway Ties

The forest area of Canada is estimated at 1,131,141 square miles. Of this area 865,880 square miles are productive and accessible, a little over one-third of this area bears timber, who received news from the Manitoba Livestock Credit Company, from recent importations. Of this number about 10 are Sheepskins, 32 Oxford, 12 Suffolk, and 8 Hampshire, to its natural strength and its adaptability to creating timber.

Great Britain has banned its use of electricity within the past six years.

Encouraging Sheep Industries

Manitoba Department Of Agriculture Distributing Breeding Stock To Beginners

Reports from the livestock branch, Manitoba Department of Agriculture, show approximately 140 head of rams distributed to breeders, mostly beginners, who received news from the Manitoba Livestock Credit Company, from recent importations. Of this number about 10 are Sheepskins, 32 Oxford, 12 Suffolk, and 8 Hampshire, to its natural strength and its adaptability to creating timber.

And Egypt looked to Arabia for the chief supplies of perfume materials.

FASHION

No. 175—Cool and Summery. This style is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 3/4 yard of 20-inch contrasting.

No. 176—For Wet Feet. This style is designed in sizes 2, 4 and 6 years. Size 2 requires 25 yards of 40-inch material, for dress and bloomers.

No. 177—Dainty Hosiery. This style is designed in sizes 8, 10 and 12 years. Size 8 requires 1 1/2 yards of 40-inch material with 1/4 yard of 16-inch contrasting and 3 1/2 yards of ribbon.

No. 178—Bath Towel. This style is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 3/4 yard of 20-inch contrasting.

No. 179—For Wet Feet. This style is designed in sizes 2, 4 and 6 years. Size 2 requires 25 yards of 40-inch material, for dress and bloomers.

No. 180—Dainty Hosiery. This style is designed in sizes 8, 10 and 12 years. Size 8 requires 1 1/2 yards of 40-inch material with 1/4 yard of 16-inch contrasting and 3 1/2 yards of ribbon.

Soil Of Canada Has Played A Large Part In Giving U.S. Some Of Its Greatest Citizens

Closely Related To Marquis

In Two Years Reward Wheat

Captured World's Championship

Marquis wheat, a hard red spring variety with which Albert H. B. Smith, of Wolf Creek, Alberta, won the world's wheat championship at the 1929 International Grain and Hay Show, Chicago, is closely related to the famous Marquis wheat. It was developed from a cross between Marquis and Prelude in 1912, at the Canadian Government Central Experimental Farm in Ottawa, with the hope of developing a variety that would combine the early ripening habits of Prelude with the greater productiveness and better straw of Marquis. The cross resulted in several exceedingly interesting and promising combinations, one of which received the name of Marquis. This new variety, as it now exists, matures in less than one hundred days from the time of planting, or about fourteen days earlier than Marquis takes to mature. Reward produces an excellent quality of flour and a very fine appearing kernel. The straw is of medium length and excellent strength. It was first released to farmers in western Canada and elsewhere in commercial quantities in 1928, and within two years had captured the world's championship.

Educational Films

United States Government Loans Motion Picture Films To Canada

Through the courtesy of the United States Government Bureau of Mines, the Canadian Department of Mines, Ottawa, has received the following motion picture films for free circulation throughout Canada:

"The Story of Sulphur" (12 reels)

"The Story of Rock" (12 reels)

"The Story of Steel" (10 reels)

"The Story of Gasoline" (13 reels)

"The Story of Iron" (12 reels)

"Through Oil Lands of Europe and Africa" (2 reels)

"The Story of Dynamite" (12 reels)

"Carbon Monoxide: The Invisible Danger" (1 reel)

These films are all on standard 15mm film, but the last one is a 16mm film. They are all of a high standard of quality and are a most remarkable exception to the usual standard of motion picture films.

No charge is made for the rental of the films, but the borrower is expected to pay express charges. Application for the loan of any of these films should be addressed to The Director, Geological Survey, Department of Mines, Ottawa, Canada.

Champion Back At Work

The Prize Hen Of Saskatchewan Wins Victoria Keeps Up Record

Lady Victoria, the world's champion hen, is back at work. After completing her year's record of 308 eggs, she laid 18 more eggs before coming to the moult in September. Her last, Saskatoon thermometer are recording such temperatures as 42 below zero, but this Harrold Rock lady, who lives in an unheated house at the University of Saskatchewan, started in last week and is again laying her daily egg.

Professor Barker commented on the size of the eggs this hen is producing. After one small preliminary egg as a try-out, the seven eggs produced during the past eight days have averaged five grams each over the standard egg weight.

A request was received from the committee of the Madison Square Garden Poultry Show, at New York, for the loan of the hen as a special exhibit. It was decided, however, that it was undesirable to send the hen to the show as the university wish to obtain as many chicks as possible from such desirable breeding stock.

Much Ado About Nothing

"For 10 years, 10 long and lean years," cried the writer, "I have been composing this drama, changing a word here, a line there, working on it until my fingers were cramped and aching, my brain and body weary from the toil."

"Too bad, too bad," the producer murmured sympathetically. "All work and no play."

Hydro Development In West

With four large undertakings at present under construction, which will ultimately provide 445,000 h.p. hydro-electric development in the Prairie Provinces, there are indications of expansion in industrial activity for 1930 and 1931.

The plot thickens," said the old lady who sowed the grass seed for the third time.

"I will meet you Wednesday, or next week."

"I have to go to America next Wednesday."

"This shall, we say, Thursday."

Outraged, Madam.

Northward into the Canadian West there is a steadily increasing migration of men and women from the United States. This migration is long enough to make up for the loss of population during the past century of Canadian citizens to the great republic.

It may not be so stated in United States school books, but the soil of Canada has played a part directly or indirectly in furnishing the United States with some of its greatest citizens.

In a little churchyard in Norwich, Orford County, Ontario, rest some of the maternal ancestors of President Herbert Hoover. In the early days they fled from the rocky fields of a Pennsylvania farm to take up land in Canada. Near Norwich, on soil that was not the best, they struggled on for many a year. Then the soil of free land in Iowa caused Hoover's grandparents to yoke up the oxen and head east. Toil and poverty were the lot of these fine Quaker people. It is any wonder that President Hoover now pleads with sympathy the resolutions for assistance of the farmers of the United States?

President Hoover's people left Orford County for Iowa about the time that Thomas A. Edison got a job as telegraph operator 20 or 30 miles north of Norwich at Stratford, in the County of Perth. It so happened that Edison, inventor of the incandescent lamp and it is said that he neglected his routine work in the railway station at Stratford to carry on his experiments in electricity.

In the seventies a boy ran away from Victoria, British Columbia, with a box of dynamite. He was a boy who had met disaster in the Cariboo goldfields, mourned for David Belasco for many a day. Then David, who was supposed to be dead, turned up very much alive. He lived to become probably the greatest producer in the history of the American stage.

These are but three examples of famous citizens of the United States who have often referred to the "home" in their lives or the lives of their parents of the free and invigorating air of the Dominion of Canada.

James J. Hill, builder of the Great Northern Railway, native of England, Ontario; the late Franklin K. Lane, minister in Woodrow Wilson's cabinet, from the Maritime; the late Captain R. D. Dollar, shipping magnate, of Scottish origin, but for many years a logger in the Ottawa Valley; Vancouver Province.

Water From Abandoned Wells Will Be Used For Loss Of Animals

In Southern Saskatchewan

That a poison of which seven drops killed a 1,000-pound horse in three days is produced by bacteria in old wells in Southern Saskatchewan, was discovered by Dr. J. S. Fulton, professor of animal diseases at the University of Saskatchewan, in one district 20 miles square, from 75 to 100 horses have been lost this winter. On one farm 80 to 140 horses died. Losses have been common in the south and west of the province. Attention was paid to the water supply when outbreaks occurred and it was found that in each case old wells had been used owing to the particularly dry season. Although the wells contained water which appeared fresh, bacteriological examination showed the presence of virulent strains of botulism in three out of four wells.

It is believed that bacteria isolated from these waters when grown in the laboratory, reports Dr. Fulton, produced a poison of which seven drops killed a 1,000-pound horse in three days.

Small quantities of the water itself when fed to experimental animals, caused death in a few days.

"I will meet you Wednesday, or next week."

"I have to go to America next Wednesday."

"This shall, we say, Thursday."

Outraged, Madam.

BEFORE YOU MAKE A PURCHASE COMPARE THE LOCAL PRODUCT

Apart from the many excellent reasons why you should give preference in your buying to "MADE-IN-ALBERTA" PRODUCTS, you will find on examination and comparison that they appeal to you by merit alone and that the range of ALBERTA-MADE GOODS is far greater than many citizens realize.

Keep the Wheels Turning in Alberta's Factories

Over \$82,000,000 is already invested in Alberta industries. Your failure to support these industries in your buying will result in unemployment, substantially reduce the wages of Albertans, and indirectly affect your own earning power. Your support will insure better business, busier factories, more work, and larger payrolls.

Rev. P. C. McCrae motored to Jenner on Thursday.

A baby girl was born to Mr. and Mrs. J. Frieder, of Gem, on May 6, in the Bassano Hospital.

Mrs. R. Sparks, of Standard, is a patient in the hospital here. She is doing well after an operation.

The trees are coming out in leaf, and in another week they will be in full foliage.

Dance after the show in the Masonic Hall Friday night this week.

Improvements are being made on the swimming pool this week. The depth is being increased near the diving board to lessen the danger of striking the bottom, and the deep end is also being covered with brick. Some changes are being made in the dressing rooms. It is expected the pool will be open just as soon as the weather is warm enough for swimming.

Helpful Husband
"What's the matter, Oscar--you look terrible!"
"My wife's on a diet."

Ancient Retainer
"How long has your cook been with you?"
"Oh, about three husbands."

FRIGIDAIRE alone gives you all these important features. Let us demonstrate.

1. The Hydrator -- a special compartment which combines cold and moisture to keep vegetables fresh and crisp.
2. The Cold Control -- for quick freezing.
3. All- porcelain-on-steel cabinets.
4. Extra powerful compressor -- completely enclosed in cabinet.
5. Wide high shelves -- no stooping required.
6. Self-sealing ice trays.
7. Incredibly quiet operation.

Is Your Child
Eligible for This
Free Camera
and Roll of Film?

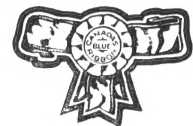

Act Promptly!

There is no time to be lost. We have only a limited number of these gift cameras. If your youngster is eligible bring him or her in at once to avoid disappointment. There are no additional conditions to meet. No red tape. No delays. The only stipulation is that each child be accompanied by a parent or guardian. And our only advice is to act promptly, for these gift cameras will not last long.

HOW OLD is your youngster? Has he become twelve years of age this year, or will he before 1940? Any boy or girl whose twelfth birthday falls in any part of 1939 is eligible, right now, for a FREE camera and roll of Kodak Film -- the gift of Canadian Kodak Co., Limited, to commemorate the Fiftieth Anniversary of Kodak.

Duchess News

DUCHESSE, May 6—At the musical program given by the pupils of Miss Bone \$7.00 was realized from the silver offering, and was given to Mr. Suter for the United Church.

A farewell party was given at the home of Mrs. Hole for Mrs. McKinnon on Friday evening. Cards and music were enjoyed. At the close of the evening delicious refreshments were served. Mrs. McKinnon was presented with a piece of silver as a parting gift by her friends. Friendly ladies were present, and they all wished her happiness in her new home.

Mrs. Ferguson is here visiting at the home of her son, J. Ferguson. Mr. and Mrs. B. Edwards have moved into the Fraser house. Mrs. J. Larson, who has been visiting at the home of her daughter, Mrs. Marcus Adams and Mrs. Henry Dahl, is leaving for an extended visit to Illinois.

Miss Ethel Rosen is back at the bank again, after several days absence.

The boys and girls who were eligible to receive the kodaks given by the Eastman Kodak Co. went into Brooks and obtained their kodaks at the City drug store.

Miss Ann Hole is one of the graduates in pharmacy at the University of Alberta, Edmonton, on May 15.

Everyone is busy putting in gardens these days.

New Kind Of Grain Tested In China

Deep Rooted Wheat Awaits Late
Rains Unwithered

PEIPING, China—Seed which will yield wheat in the arid regions of China and so serve to prevent famine, was recently exported to the Peiping Rotary Club by L. M. Outerbridge, who has completed interesting agricultural experiments at Peking in Shantung Province.

The purpose of the experiments was to find a seed suitable to Shanai, Shensi, and Kansu provinces, where drought has been a plague for centuries. For several seasons it has been impracticable to undertake artificial irrigation in these regions, and many crop failures have been reported due to delayed rains.

Mr. Outerbridge showed by means of photographs that the new drought resisting seed produced a beautiful crop where the old native grain succumbed.

All experiments were carried out in ways feasible for the peasants to imitate, and for this reason the use of foreign machinery was ruled out.

Although it could be shown that deeper plowing would retain moisture in the ground and thus sustain the life of a plant during the dry spell, the agricultural workers at Peking decided not to employ the deep plowing foreign plows because the Chinese could not afford to buy them and could not work them with the animals at their disposal. Reforestation, although undoubtedly valuable, was also ruled out as a future preventive measure for the immediate future.

The new seed grain, which was selected for its deep root and thick leaves, has the ability to wait for late rains without withering. Careful research into soil conditions and experimentation with many seeds was selected for this territory.

Samples of seed from many parts of the world were tested to discover grain suitable for the arid conditions. Last year co-operative tests were conducted on more than 100 farms and the result showed that certain drought resistant seeds, sown side by side with the local seed, produced bountiful crops, which in some cases exceeded four times that of the customary seed.

Valuable Precedent
Judge (Editorial): "What's your excuse for speeding sixty miles an hour?"

Victim: "I had just heard, Your Honor, that the ladies of my wife's church were giving a rummage sale, and I was hurrying home to save my other pair of trousers."

Judge: "Case dismissed."
